

28 January 1965

Dear Frank:

In connection with the subject matter this contractor is pleased to forward the following:

1. The writer's "ROUGH DRAFT" of the contract which may assist you in compiling the final instrument.
2. Three (3) copies (Nos. 3, 4, and 5) of the Work Statement for the Follow-on EMR procurement, said Work Statement cited as Exhibit "A" under Enclosure 1.
3. Three (3) copies of the GFP requirements list, said list cited as Exhibit "B" under Enclosure 1.

With regard to each of the above enclosures please be advised as follows:

- (a) The Contract "ROUGH DRAFT" reflects primarily the content of the present contract AF33(657)-12286 taking into account additional factors pertinent to either the RFP or the procurement itself. In connection with "PART VII - APPROVALS" it is submitted that consideration might be given to the elimination of those fixed price approval requirements listed under 1 and 2 thereof. The correspondence attached hereto (dated 21 Jan. 1965) eliminates the requirement for approval of fixed price contracts insofar as this contractor's obligation to the cognizant USAF District Office is concerned. In consideration of the time and effort saving that is involved, you might desire to incorporate this license in the subject contract.
- (b) Enclosure 2 has been reviewed by SPO personnel [redacted] and a copy turned over to him during his most recent visit. It is trusted this Work Statement accurately reflects our recent negotiations and contract obligations however, there is always the possibility of future comments from SPO personnel which might have to be taken into account. STAT
- (c) Enclosure 3 reflects all requirements for GFP items up to and including the present date. Here again it is trusted the listing is accurate, however, Depot Personnel might have some additional comments to offer.

It is trusted you will find the overall package suitable. Regretfully same has not been submitted sooner, however, certain underlying factors, primarily concerning the definitization of equipment performance specifications has taken longer than anticipated. The writer is presently working on a similar type package for the CPC procurement (contract AF33(657)-12843) which will probably be available for submittal to your office during the week of February 15. Please contact the undersigned in the event interim information is required.

Regards,

Jim
